PROJECT

Project - 1
E-commerce website

- Developed an interactive clothes shopping platform using HTML, CSS, Bootstrap, and ReactJS.
- Enabled dynamic fetching and display of clothing details including name, price, size, and description.
- Implemented 'Add to Cart' functionality to manage the shopping cart, displaying selected clothes and sizes.
- Integrated a JSON server for efficient backend data management and order processing.

Project - 2
BookMyShow app clone

- Developed a BookMyShow app clone using HTML, CSS, and React.
- Implemented dynamic fetching and display of movie details including showtimes, theaters, and descriptions.
- Integrated 'Book Tickets' functionality allowing users to select seats and manage their bookings.
- Employed React for interactivity and state management, ensuring a seamless user experience
